## Abstracts

The global Engine Mounts market size is expected to reach \$ 5858 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

This report studies the Engine Mounts market. An engine mount is the part that holds the engine to the body or to the engine frame of the car. In a typical car, the engine and transmission are bolted together and held in place by three or four mounts. Engine mounts perform important as well as diverse tasks in vehicles: As a joining element between the engine and the vehicle, they prevent undesired vibrations from the unit and driveline being transferred to the rest of the vehicle and, at the same time, they also ensure that noises are insulated. Above all, they must also be strong enough to keep the engine stable within the vehicle, even when traveling on poor roads or in the event of collisions.

Global Engine Mounts key players include TrelleborgVibracoustic, ContiTech, Hutchinson, Sumitomo Riko, Bridgestone, etc. Global top five manufacturers hold a share about 40%. Europe is the largest market, with a share about 30%, followed by North America and China, both with a share about 20 percent. In terms of product, Hydraulic Engine Mount is the largest segment, with a share about 55%. And in terms of application, the largest application is Passenger Car, followed by Commercial Vehicle, etc.

This report studies the global Engine Mounts production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Engine Mounts and provides market size (US\$ million) and Year-over-Year (YoY) Growth,
