Abstracts

The global Engineered Quartz Stone (EQS) market size is expected to reach \$ 26630 million by 2032, rising at a market growth of 10.1% CAGR during the forecast period (2026-2032).

East Engineered Quartz Stone (EQS) is made from either a natural slab that has been polished or engineered quartz composite. Quartz is one of the hardest natural materials on earth and has an appearance similar to granite. It is comprised of silicon dioxide. Pure, natural quartz slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab. The East Engineered Quartz Stone (EQS) is used for kitchen and bathroom counters, no matter in personal home or commercial establishments or other industries.

Global engineered quartz stone (EQS) key players include Vicostone, Caesarstone, COSENTINO, Zhongxun, etc. Global top 3 manufacturers hold a share over 20%.

North America is the largest market, with a share over 45%, followed by Asia-Pacific and Europe, both have a share about 40 percent.

In terms of product, quartz surface is the largest segment, with a share about 70%. And in terms of application, the largest application is residential quartz, followed by commercial quartz.

This report studies the global Engineered Quartz Stone (EQS) production, demand, key
