Abstracts

According to our (Global Info Research) latest study, the global Engineered Stone market size was valued at US\$ 21110 million in 2024 and is forecast to a readjusted size of USD 35320 million by 2031 with a CAGR of 7.7% during review period.

Engineered stone is a composite material made of crushed stone bound together by an adhesive, (most commonly polymer resin, with some newer versions using cement mix). The two common stones used in producing these products are marble and quartz. The application of these products depends on the original stone used. For engineered marbles the most common application is indoor flooring and walls, while the quartz based product is used primarily for kitchen countertops. Related materials include geopolymers and cast stone. Unlike terrazzo, the material is factory made in either blocks or slabs, cut and polished by fabricators, and assembled at the worksite.

Global Engineered Stone key players include DuPont, Staron (SAMSUNG), LG Hausys, Kuraray, Aristech Acrylics, etc. North America is the largest market, with a share about 25%, followed by Europe, with a share about 20 percent. In terms of product, Solid Surface is the largest segment, with a share about 90%. And in terms of application, the largest application is Bathroom, followed by Flooring, Kitchen Countertops, Facades, etc.
