The global Enhanced Vision System (EVS) market size is expected to reach \$ 443 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Enhanced vision system, a stand-alone thermal imaging camera that sees infrared energy emitting, or radiating, from objects and forms a real-time video image that is displayed on an MFD or dedicated video display screen. The system's primary benefit is improving situational awareness. At night, an EVS eliminates the visual effects of darkness, turning it into day on the display, and enabling the pilot to see and avoid clouds at night. During the day, the system enables the pilot to see through smoke, haze and smog.
