Network Access Control (NAC) solutions provide network visibility and allow you to manage network access. They can help IT teams to restrict any devices and users that are unauthorized or non-compliant from accessing the network. This is achieved through policy enforcement for devices and users when accessing a network. It can enforce access policies based on authenticated user identities, and can verify, authenticate, and authorize users and devices that are trying to connect to a network. This means that all devices connected to the network will be compliant with the company’s security policies.
