## Abstracts

The global Enterprise Agile Project Planning Tool market size is expected to reach \$ 3267 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

Enterprise Agile Project Planning Tools are enterprise-grade software platforms designed to support agile project planning, requirements management, sprint planning, portfolio management, resource coordination, and cross-team collaboration. These platforms typically support Agile frameworks such as Scrum, Kanban, SAFe, and LeSS while integrating roadmap planning, task tracking, defect management, resource allocation, progress monitoring, analytics, and AI-assisted decision-making. They enable organizations to manage the entire project lifecycle from strategic planning to execution and are widely adopted across software development, manufacturing, financial services, telecommunications, Internet services, government agencies, and enterprise digital transformation programs.

The upstream segment of the Enterprise Agile Project Planning Tools industry includes cloud infrastructure providers, databases, middleware, artificial intelligence technologies, big data analytics platforms, identity management, cybersecurity solutions, and DevOps development tools. Midstream vendors focus on software development, platform design, SaaS operations, system integration, and technical services while providing open APIs to integrate with Git repositories, CI/CD pipelines, ERP, CRM, IT service management, and collaboration platforms. Downstream customers include software companies, Internet enterprises, financial institutions, manufacturers, telecommunications operators, government agencies, and other large organizations that use these platforms for product development, digital transformation, IT project management, engineering collaboration, and enterprise portfolio

management. The rapid adoption of AI-assisted software engineering and scaled Agile practices continues to drive demand for intelligent planning, resource optimization, and cross-team coordination capabilities.
