The global Enterprise Cloud Fax Solution market size is expected to reach \$ 1061 million by 2032, rising at a market growth of 5.8% CAGR during the forecast period (2026-2032).

An enterprise cloud fax solution is a cloud-based service that lets large organizations send and receive faxes digitally (without traditional fax machines or on-prem fax servers) using email, web portals, mobile apps, or API integrations with business systems like EHR/EMR, ERP, and document management platforms. It typically provides centralized administration, user and access controls, encryption and secure transport, audit logs, compliance support (e.g., HIPAA/GDPR where applicable), number/line management, high availability, and scalable capacity so faxing can be handled reliably across multiple sites, departments, and workflows while reducing telecom and infrastructure overhead.
