## Abstracts

According to our (Global Info Research) latest study, the global Enterprise Digital Transformation Consulting market size was valued at US\$ 56721 million in 2025 and is forecast to a readjusted size of US\$ 98843 million by 2032 with a CAGR of 8.3% during review period.

Enterprise digital transformation consulting is a strategic service that helps organizations modernize operations, integrate advanced technologies (AI, cloud, IoT), and drive innovation to improve business performance.

Enterprise digital transformation consulting occupies a core position in the digital service industry chain. Upstream, it connects with technology providers and software vendors in cloud computing, artificial intelligence, big data, and the Internet of Things. Midstream, it integrates strategic consulting, management consulting, IT consulting, and system integration services, providing end-to-end solutions for enterprises in various industries such as manufacturing, finance, retail, healthcare, and energy. These solutions range from top-level design, business process reengineering, data governance, and technology architecture upgrades to organizational change and talent empowerment. Downstream, it extends to the value realization stages of enterprise clients, including intelligent operations, customer experience optimization, product and service innovation, and sustainable development. The gross profit margin of the Enterprise Digital Transformation Consulting industry is approximately between 30% and 50%.
