Abstracts

The global Enterprise Information Service market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Enterprise SMS service means that enterprises send SMS messages to mobile phone users through SMS platforms to realize information transmission and communication between enterprises and users. Enterprises can use SMS services to realize the transmission and exchange of internal information and improve the internal office efficiency and collaboration capabilities of the enterprise. For example, send meeting notices, event information, etc. to employees through the SMS platform. Enterprises can use SMS services to push marketing information to a large number of mobile phone users to achieve precise marketing and promotion. Because SMS has the characteristics of accurate, interactive, calculable, manageable and high delivery rate, enterprises can achieve rapid communication and brand promotion through SMS services.

This report studies the global Enterprise Information Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Enterprise Information Service, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Enterprise Information Service that contribute to its increasing demand across many markets.
