According to our (Global Info Research) latest study, the global Enterprise Intranet Solution market size was valued at USD 13170 million in 2023 and is forecast to a readjusted size of USD 31740 million by 2030 with a CAGR of 13.4% during review period.

An intranet is a restricted and private communications network hosted online. Each intranet is typically accessible by a specific group of people, such as the members of a team or company. Enterprise Intranet Solution exist to provide staff with a centralized location to work together, share media, communicate, train, provide and receive feedback, or otherwise collaborate on a variety of tasks. Employee intranet solutions allow companies to cherry-pick or bundle features from other types of software like internal communications software or business content management software. If the intranet doesn't provide a feature natively, it will often integrate with common or frequently used software solutions and enable users to access it from inside the intranet portal.

The increasing reliance of enterprises on cloud computing technology to store and access huge corporate data on cloud platforms is expected to drive the growth of the intranet software market.
