EMM's help to secure a wide range of different devices, including wearables, offering features such as two-factor authentication, data encryption, and remote control of a device, whereby the IT team can take control of the device and either remotely lock or remotely wipe it. All of this is to ensure that any data that is on the device is kept secure.

The freedom and flexibility that mobile+cloud bring are powerful, and they have given workers more opportunities than ever before to be productive while on the go. Keeping our digital lives connected, as well as seamlessly syncing and saving our work-related and personal content, distributed teams now regularly collaborate via virtual workplaces. What's more, mobile solutions provide access from any location, because the cloud's flexibility and scalability deliver the necessary data, software, and business agility.
