Abstracts

According to our (Global Info Research) latest study, the global Environmental Gas Sensor market size was valued at US$ 10330 million in 2025 and is forecast to a readjusted size of US$ 16070 million by 2032 with a CAGR of 6.6% during review period.

The industrial segment devoted to creating, manufacturing, and distributing sensors intended to identify and gauge the concentration of different gases in the environment is known as the environmental gas sensor market. These sensors provide information on pollutants like carbon dioxide, carbon monoxide, nitrogen oxides, methane, sulfur dioxide, and volatile organic compounds. They are also used to measure emissions, monitor air quality, and detect gas leaks. Gas sensors play a vital role in industrial environments by identifying leaks and averting mishaps, explosions, and fires. This guarantees infrastructural and worker safety by delivering real-time data on air quality, integrating gas sensors into the Internet of Things (IoT) infrastructure, and implementing smart city projects to improve urban living. To raise everyone's standard of living, this data can be utilized to make well-informed judgments on industrial operations, traffic control, and urban development.

In 2023, According to a recent global analysis by Swiss air quality technology company IQAir, India ranked third most polluted country globally with an average population-weighted fine particulate matter (PM) 2.5 concentration of 54.4 micrograms per cubic metre (?g/m3). In Beijing, a significant number of air quality monitoring stations have been set up to track pollution levels continuously. This data is used to inform the public and guide government policies aimed at reducing air pollution. China has established a comprehensive national air quality monitoring network that includes thousands of

monitoring stations equipped with advanced environmental gas sensors to measure pollutants such as PM2.5, PM10, CO2, NO2, SO2, and O3. These sensors provide real-time data to help enforce environmental regulations and improve public health.
