According to our (Global Info Research) latest study, the global Environmental Health and Safety Software market size was valued at USD 207.8 million in 2023 and is forecast to a readjusted size of USD 427 million by 2030 with a CAGR of 10.8% during review period.

Environmental health and safety (EHS) software is a type of software that helps organizations manage and ensure compliance with environmental regulations, occupational health and safety standards, and overall workplace safety. Through the use of this software, organizations can monitor their environmental performance, track and reduce their waste and emissions, prevent and respond to accidents and incidents, conduct audits and inspections, manage risks and corrective actions, and provide training and awareness to their employees. EHS software can also help organizations improve their sustainability and social responsibility by reducing their environmental impact and enhancing their safety culture.

The industry trend of EHS software is driven by several factors, such as:

The increasing demand for digital transformation of EHS processes from organizations that want to improve their efficiency, agility, visibility, and resilience in the face of changing regulations, stakeholder expectations, market conditions, and environmental challenges .

The emergence of new technologies and innovations that enable smarter and more integrated EHS solutions, such as cloud computing, artificial intelligence (AI), machine learning (ML), internet of things (IoT), big data analytics, blockchain, augmented reality

(AR), virtual reality (VR), drones, wearables, sensors, biometrics, and more .

The evolving regulatory landscape that poses both challenges and opportunities for EHS software providers, such as data privacy and security regulations (e.g., GDPR), climate change regulations (e.g., Paris Agreement), circular economy regulations (e.g., EU Circular Economy Action Plan), human rights regulations (e.g., UN Guiding Principles on Business and Human Rights), chemical regulations (e.g., REACH), occupational health and safety regulations (e.g., OSHA), environmental reporting regulations (e.g., GRI Standards), sustainability reporting regulations (e.g., TCFD Recommendations), and more .

The increasing competition and collaboration among different players in the EHS software market, such as traditional EHS software vendors (e.g., Enablon), niche EHS software vendors (e.g., Donesafe), quality management software vendors (e.g., ETQ), ERP software vendors (e.g., SAP), tech giants (e.g., Microsoft), consulting firms (e.g., Deloitte), certification bodies (e.g., DNV GL), industry associations (e.g., NAEM), standard setters (e.g., ISO), regulators (e.g., EPA), customers (e.g., Walmart), suppliers (e.g., BASF), investors (e.g., BlackRock), NGOs (e.g., Greenpeace), academia (e.g., Harvard), media (e.g., Forbes), and more .
