Abstracts

The global Environmentally Friendly ABC Dry Powder Fire Extinguishing Agent market size is expected to reach \$ 986 million by 2032, rising at a market growth of 6.3% CAGR during the forecast period (2026-2032).

In 2025, the global production of environmentally friendly ABC dry powder fire extinguishing agent reached 980,000 tons, with an average selling price of US\$641/ton. Environmentally friendly ABC dry powder fire extinguishing agent is a composite fire extinguishing material composed of ammonium phosphate salts, anti-caking agents, flow promoters, silicone oil, and other additives. It has a specific particle size distribution, is finely ground, dry, and easily flows. It achieves high-efficiency fire extinguishing through a dual mechanism of physically isolating oxygen and chemically inhibiting chain reactions. It features rapid extinguishing speed, high extinguishing efficiency, good electrical insulation, long shelf life, and can be used in conjunction with foam fire extinguishing agents containing fluorocarbon surfactants. It is suitable for extinguishing Class A, Class B, and Class C fires, as well as fires involving electrical equipment, but not for metal fires (such as magnesium and sodium) or acid/alkali fires. Environmentally friendly ABC dry powder fire extinguishing agent is generally filled in portable dry powder fire extinguishers, wheeled fire extinguishers, and dry powder fire trucks for fire prevention and suppression in oil depots, warehouses, ships, substations, cable tunnels, power distribution rooms, petrochemical facilities, and other similar locations. The upstream of the industry chain consists of phosphorus chemical raw materials (phosphates, monoammonium phosphate, etc.), additives and coating materials, and packaging materials; the midstream consists of manufacturers who handle powder formulation and mixing, sieving and drying, flowability and anti-caking treatment, testing (including moisture content, particle size, flowability and fire

extinguishing rating verification), and filling into fire extinguishers/dry powder systems; the downstream consists of fire extinguisher manufacturers. Gross profit margins range from 15% to 25%.
