According to our (Global Info Research) latest study, the global Environmentally Friendly Pesticide Sustained Release Agent market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Environmentally friendly pesticide sustained-release agents are a type of pesticide auxiliary used in agriculture and horticulture. Their main purpose is to improve the effectiveness of pesticides and reduce negative impacts on the environment. These sustained-release agents have the characteristics of controlled release of active ingredients, which can help reduce the excessive use of pesticides, increase crop yields, and reduce pollution and damage to the environment. As technology continues to develop, slow-release agents will be designed more precisely to meet the needs of different crops, soils and climate conditions. This will help improve the implementation of precision agriculture. Future environmentally friendly pesticide sustained-release agents will pay more attention to sustainability and environmental protection. This includes reducing or eliminating negative impacts on the environment, using degradable materials and green manufacturing methods.
