The global EOBD Scanner market size is expected to reach \$ 1202 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

EOBD Scanner is an electronic diagnostic tool used to read and clear fault codes from vehicles that comply with European On-Board Diagnostics standards. It connects to a vehicle's diagnostic port and helps users or technicians identify problems related to the engine, emissions system, sensors, fuel system, and other electronic control units. Compared with a basic code reader, an EOBD scanner may provide live data, freeze-frame data, readiness status, and emission-related diagnostic information, making it widely used in vehicle maintenance, inspection, and repair. In 2025, global EOBD Scanner production reached approximately 975 k units, with an average global market price of around 824 USD/unit. The production capacity for EOBD Scanner in 2025 was approximately 1000 k units. The typical gross profit margin for EOBD Scanner between 20% and 40%.

The EOBD Scanner market is an important segment of the automotive diagnostic equipment industry, driven by the growth of vehicle ownership, stricter emission regulations, increasing vehicle electrification, and expanding aftermarket repair demand. As passenger cars and commercial vehicles adopt more ECUs, sensors, and emission control systems, repair shops, inspection stations, fleet operators, and individual vehicle owners increasingly require efficient diagnostic tools. In the future, EOBD scanners are expected to develop toward multi-brand compatibility, wireless connectivity, cloud-based data analysis, mobile app integration, and intelligent diagnostics.

This report studies the global EOBD Scanner production, demand, key manufacturers, and key regions.
