Scope of the Report:

This report focuses on the EPA/DHA (Omega 3) Ingredients in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Omega-3s are considered a healthy fat that is critical to our brain and heart function, as well as our overall well-being. Our bodies cannot produce Omega-3s on its own at significant levels, so as a result, it is essential that we consume this type of fat in our daily diet. Omega-3 fatty acids are one of the most well studied nutrients in the world, with more than 30,000 scientific studies and published papers over the past 35 years demonstrating that Omega-3's can deliver valuable health benefits at every life stage – from before birth and into your senior years. Omega-3 is found mainly in marine fish, as well as algae and certain plants. Today, fish is our major dietary source of both Omega-3 EPA and DHA – the dynamic duo of fatty acid nutrients. Omega-3 eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) help to support overall health across every system in the body – from brain and eye development in infants, to the maintenance of cardiovascular health in adults and seniors. Europe, led by France

and Germany omega 3 ingredient market, is anticipated to witness an annual growth over 2017-2023. Asia Pacific omega 3 ingredient market size is expected to grow significantly, owing to increase in consumer spending, ageing population, and the demand across dietary supplements application.
