EPDM (Ethylene Propylene Diene Monomer) is a synthetic rubber that is commonly used for gaskets and seals due to its excellent resistance to weathering, ozone, UV light, and many chemicals. EPDM gaskets and seals are typically black in color and have a smooth, non-porous surface that provides excellent sealing properties. They can be custom-designed to fit specific applications and can be manufactured in various shapes and sizes. EPDM gaskets and seals are often used in applications where a tight seal is required to prevent leaks or to keep out contaminants.
