## Abstracts

The global EPDM Reclaim Rubber market size is expected to reach \$ 406 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032). Global sales of EPDM Reclaim Rubber was about 289 k tons in 2025 with average price of 925 USD/ton. The average gross margin of the industry is between 15%-20%. India and China are the major producers of the product globally.

EPDM Reclaim Rubber is a recycled elastomer feedstock made from post-vulcanized EPDM waste (e.g., automotive EPDM parts, roofing membranes, profiles, seals). It is produced by size reduction (grinding) and, in many grades, reclaiming/devulcanization that selectively reduces the crosslinked network so the material can be blended with virgin rubber and re-vulcanized for reuse in new compounds.

This report studies the global EPDM Reclaim Rubber production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for EPDM Reclaim Rubber and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of EPDM Reclaim Rubber that contribute to its increasing demand across many markets.
