The global EPDM Rubber Strip market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

EPDM rubber strip is widely used in various industries including automotive, construction, and aerospace. With the growing demand for sustainable and durable materials, EPDM rubber strip is expected to witness steady growth in the market. The increasing use of EPDM rubber strip in sealing applications is also expected to drive its market growth. The market outlook for EPDM rubber strip relies on the development of new technologies, increased government regulations, and demand from end-use industries.

EPDM rubber strip is a type of rubber gasket or sealing strip that is composed of ethylene propylene diene monomer (EPDM) rubber material. EPDM rubber is known for its excellent resistance to weathering, ozone, UV, and extreme temperatures, making it an ideal material for outdoor applications. EPDM rubber strips are commonly used as a seal or gasket in automotive, construction, and industrial applications to prevent the ingress of water, air, and dirt. They can also serve as a cushion or barrier between two surfaces, providing protection from vibration, impact, or friction. EPDM rubber strips come in a variety of shapes and sizes, including flat, round, rectangular, and square, and can be cut or molded to fit specific needs.

This report studies the global EPDM Rubber Strip production, demand, key manufacturers, and key regions.
