Abstracts

According to our (Global Info Research) latest study, the global EPDM Waterproofing Sheet market size was valued at US\$ 3951 million in 2025 and is forecast to a readjusted size of US\$ 5297 million by 2032 with a CAGR of 4.7% during review period.

EPDM waterproofing sheets are single-ply elastomeric membranes made from ethylene-propylene-diene rubber, manufactured as cured sheets (non-reinforced or reinforced with polyester scrim) and installed via fully-adhered, mechanically-attached, or ballasted assemblies; seams are typically completed with compatible tapes/adhesives and accessories, and the membrane is widely valued for excellent UV/ozone weathering resistance and long-term flexibility on flat and low-slope roofs and related building-envelope waterproofing uses. Global EPDM waterproofing sheet sales in 2025 is estimated at 1,200 kilotons, with an average ex-works price of 3,200 US\$/ton. And global capacity is about 1,800 kilotons , with a gross margin range of 18%–30%.

Upstream inputs include EPDM compounding ingredients (rubber, fillers, curing system, processing aids), reinforcements (polyester scrim/nonwovens) and compatible seam/adhesive accessories; midstream manufacturers calender/extrude and cure EPDM sheets; downstream demand is realized via roofing/waterproofing system providers and contractors serving building roofs, industrial facilities and selected below-grade waterproofing projects.
