## Abstracts

The global Epichlorohydrin market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Epichlorohydrin (ECH) is a clear colorless liquid with an irritating chloroform-like odor. It is a highly reactive organochlorine compound and is used in the production of glycerol, plastics, epoxy glues and resins, and elastomers. In contact with water, epichlorohydrin hydrolyzes to 3-MCPD, a carcinogen found in food. Epichlorohydrin is readily biodegradable and is not expected to persist in the environment. Epichlorohydrin has a low potential to bioaccumulate, and is not expected to adsorb to soil or sediment. In water, epichlorohydrin will be rapidly broken down by both biological and non-biological mechanisms. In air, epichlorohydrin will rapidly dissipate and break down. In the case of soil exposure, epichlorohydrin will mostly remain in groundwater rather than soil particulates, and will be rapidly degraded.

ECH was first described in 1848 and was isolated during studies on reactions between glycerol and gaseous hydrogen chloride.

ECH is classified by several international health research agencies and groups as a probable or likely human carcinogen in humans. Prolonged oral consumption of high levels of epichlorohydrin could result in stomach problems and an increased risk of cancer.

World of Epichlorohydrin production presents two characteristics: one is less production countries and regions, and regional development imbalance, China, the United States, Germany, Japan and China's China Taiwan region total production capacity of more than 85% of the world's total production capacity. The second is capacity more

concentrated, and the world more than 50% of capacity is concentrated in Dow (Dow) chemistry, Shandong Haili, Solvay (Solvay), Formosa Plastics and other minority several companies.

This report studies the global Epichlorohydrin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Epichlorohydrin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Epichlorohydrin that contribute to its increasing demand across many markets.
