Abstracts

Based on product, the global market for epigenetics, is segmented into enzymes, instruments and consumables, kits, reagents, and bioinformatics tools. In 2017, the kits segment accounted for the largest share of global market for epigenetics. The large share of this segment is attributed to the fact that a large number of kits are used in epigenetic techniques. The rising prevalence of a number of diseases, increasing R&D spending, and increased government funding for life science research are the other factors supporting market growth.
