Abstracts

According to our (Global Info Research) latest study, the global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market size was valued at US\$ 159 million in 2025 and is forecast to a readjusted size of US\$ 207 million by 2032 with a CAGR of 3.9% during review period.

Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner is a specialized heat exchanger material designed specifically for air conditioning systems, where a hydrophilic epoxy coating is applied to aluminum foil to enhance condensate drainage, corrosion resistance, and thermal exchange efficiency. It is widely used in evaporator and condenser fin structures to improve system energy efficiency and operational stability under varying humidity conditions. In 2025, the production of Epoxy-coated Hydrophilic Aluminium Foil was 18 million square meters with an average price of 8.6 USD per square meter. In 2025, the capacity utilization rate was about 70%, and the average gross margin was approximately 13%. The upstream primarily comprises primary aluminum ingots and rolling mills, with representative suppliers including Alcoa, Norsk Hydro, UC Rusal and Aluminum Corporation of China, and major equipment suppliers such as Danieli and SMS Group. The midstream involves hot rolling, surface degreasing and cleaning, hydrophilic epoxy coating application, curing, and performance testing, with emphasis on coating uniformity, adhesion stability, and hydrophilicity control. The downstream customers are manufacturers of residential air conditioners, automotive air conditioning and commercial HVAC systems, represented by companies such as Carrier, Daikin, Toyota, Midea and Gree.

Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner is closely linked to the upgrading cycle of HVAC equipment driven by energy efficiency regulations and

refrigerant transition requirements. Its role in evaporator and condenser fin applications is becoming more critical as manufacturers focus on improving heat exchange efficiency and condensate management in compact air conditioning systems. Demand is reinforced by replacement cycles in residential units and continued expansion of commercial building installations, particularly in regions with high humidity and temperature variability. However, adoption is influenced by coating process consistency, cost control pressure, and performance durability under long-term thermal cycling conditions. Future development depends on material optimization and alignment with stricter environmental and efficiency standards.

This report is a detailed and comprehensive analysis for global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market size and forecasts, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Sq m), and average selling prices (US\$/Sq m), 2021-2032

Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market shares of main players, shipments in revenue (\$ Million), sales quantity (Sq m), and ASP (US\$/Sq m), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Dingsheng New Materials (China), Jiangsu Alcha Aluminium Group (China), Henan Mingtai Al. Industrial (China), Shantou Wanshun New Material Group (China), Chalco Aluminum (China), Guangdong Hec Technology (China), UACJ (Japan), Shandong Nanshan Aluminum (China), Shanghai Huafo Aluminum Corporation (China), Novelis (USA), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 8011

1.3.3 1100

1.3.4 1200

1.3.5 3102

1.3.6 Others

1.4 Market Analysis by Thickness

1.4.1 Overview: Global Epoxy-coated Hydrophilic Aluminium Foil for Air Conditioner Consumption Value by Thickness: 2021 Versus 2025 Versus 2032

1.4.2 Thickness
