## Abstracts

The global Epoxy Resin market size is expected to reach \$ 14073 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

Epoxy resin is a thermosetting polymer known for its strong adhesion, chemical resistance, and durability. It is created by mixing an epoxy resin with a hardener, which triggers a curing reaction, forming a rigid and tough material. Epoxy resin bonds well to various surfaces, making it widely used in adhesives, coatings, electrical insulation, and composite materials. It is also valued for its water resistance and mechanical strength, making it ideal for industrial, construction, and artistic applications, such as flooring, marine coatings, and resin art.

The global production of epoxy resin exceeded 4 million tons in 2025, with an average ex-factory price of approximately \$2,200 per ton.

Upstream value is anchored in access to epichlorohydrin, bisphenol derivatives, and chlor-alkali integration, with producers such as Olin describing an epoxy chain spanning aromatics, allyl chloride, epichlorohydrin, liquid/solid epoxy resins, and formulated solutions; midstream producers position around breadth of grades and application support (e.g., Huntsman's Araldite/Aradur portfolio, Kukdo's epoxy families, Nan Ya's epoxy offerings, and Aditya Birla's epoxy and epichlorohydrin footprint).

Downstream, value and qualification power concentrate in formulators and converters serving corrosion protection, structural bonding, advanced composites, and especially electronics materials, where vertically integrated players link epoxy resin to laminates and related inputs as Kingboard discloses upstream materials for laminates include epoxy resin making reliability specifications, contamination control, and customer approval cycles the true gatekeepers of margin resilience.

Epoxy demand is being pulled by downstream re-industrialization and infrastructure programs, by government-led clean-energy and manufacturing incentives, and by semiconductor supply-chain localization initiatives that raise the strategic value of high-

reliability materials; at the same time, the sector is being pushed into reformulation and portfolio optimization by tighter chemical governance illustrated by the EU's prohibition framework for bisphenol A in food-contact materials which accelerates innovation in can/coating chemistries and raises qualification barriers, while cyclical swings in chlor-alkali and aromatics-linked feedstocks keep cost management and backward integration central to competitiveness.

Across paints and coatings, epoxy remains the workhorse for anti-corrosion protection, yet regulatory change in food-contact materials forces accelerated migration toward alternative chemistries and compliance-by-design. Adhesives and composites are increasingly specification-driven as OEMs demand lighter structures, higher service temperatures, and longer warranty horizons. The most rapidly intensifying spec race is in electrical and electronics, where public policy and corporate capex focus on semiconductor and advanced packaging capacity, pulling demand toward low-ionic, high-purity, and reliability-validated epoxy systems; reinforcing this direction, DIC has publicly tied new epoxy-resin capacity investment to securing stable supply for semiconductor-related materials, while Japanese materials groups are also showcasing lower-footprint approaches such as mass-balance, plant-derived epoxy use in composite prepregs.

North America's epoxy consumption narrative is increasingly framed by infrastructure renewal and supply-chain localization policies, supporting durable demand for protective coatings, industrial maintenance systems, and domestic electronics build-outs; large integrated chlor-alkali/epoxy platforms remain structurally advantaged in such an environment. Europe pairs mature coatings and industrial demand with some of the world's most consequential chemical-safety interventions, turning compliance, reformulation speed, and customer re-qualification execution into a competitive differentiator, particularly for packaging coatings. Asia-Pacific continues to couple broad manufacturing density with electronics materials ecosystems, where integration from epoxy resin into laminates and adjacent inputs can shorten qualification loops and stabilize supply; Japan's specialty materials investments targeted at semiconductor-related end uses further reinforce the region's role as a technology and reliability benchmark.

#### Latest developments

19 Dec 2024 / effective framework from 20 Jan 2025 (EU): The European Commission adopted Commission Regulation (EU) 2024/3190, establishing a prohibition regime for bisphenol A and related substances in food contact materials, a change with direct implications for epoxy-based can and metal packaging coatings qualification and material selection.

08 Jul 2022 (Japan): Mitsubishi Chemical Group announced it would discontinue production and sale of some solid bisphenol-A epoxy resin products, with the end of

production/sales communicated for end of March 2024, signaling portfolio rationalization amid evolving market and regulatory conditions.

01 Aug 2025 (Japan): DIC resolved to build a new epoxy resins production facility at its Chiba Plant, explicitly positioning the project as strengthening stable supply of materials used in semiconductor-related applications.

19 Dec 2024 (EU): The European Commission adopted Commission Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and certain related bisphenols in food-contact materials and articles. For epoxy, the practical impact is most direct in can/metal packaging coatings and related food-contact varnishes/coatings, where compliance-driven reformulation and re-qualification have become mandatory business milestones.

26 Feb 2025 ? 25 Jul 2025 (EU): The EU moved from provisional to definitive anti-dumping measures on imports of epoxy resins: Regulation (EU) 2025/393 imposed a provisional anti-dumping duty on imports originating in China, Taiwan, and Thailand; Regulation (EU) 2025/1505 subsequently imposed definitive anti-dumping duties on imports from China, Taiwan, and Thailand, and terminated the investigation for South Korea. The Commission publicly framed this as action against ?unfairly traded? epoxy resins affecting EU producers.

30 Apr 2025 (United States): The U.S. International Trade Commission (USITC) determined that a U.S. industry is materially injured by imports of epoxy resins from South Korea, Taiwan, and Thailand that Commerce had found to be dumped (and, for certain sources, subsidized). The USITC also found imports from China and India to be negligible and voted to terminate the investigations for those two countries; the release further stated that Commerce would issue AD orders (Korea/Taiwan/Thailand) and CVD orders (Korea/Taiwan).

27 May 2025 (United States): The U.S. government published the formal step that Commerce is issuing antidumping duty orders on certain epoxy resins from South Korea, Taiwan, and Thailand, marking the transition from investigation findings into enforceable trade remedies.

This report studies the global Epoxy Resin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Epoxy Resin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Epoxy Resin that contribute to its increasing demand across many markets.

### **Highlights and key features of the study**

Global Epoxy Resin total production and demand, 2021-2032, (Kilotons)

Global Epoxy Resin total production value, 2021-2032, (USD Million)

Global Epoxy Resin production by region & country, production, value, CAGR,

2021-2032, (USD Million) & (Kilotons), (based on production site)

Global Epoxy Resin consumption by region & country, CAGR, 2021-2032 & (Kilotons)

U.S. VS China: Epoxy Resin domestic production, consumption, key domestic manufacturers and share

Global Epoxy Resin production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Kilotons)

Global Epoxy Resin production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

Global Epoxy Resin production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

This report profiles key players in the global Epoxy Resin market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Kukdo Chemical, Westlake, Olin, Nan Ya Plastics, Sanmu Group, Chang Chun Group, Huntsman, Jiangsu Yangnong Chemical Group, Aditya Birla Chemicals, Kumho P&B Chemicals, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Epoxy Resin market

### **Detailed Segmentation:**

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Kilotons) and average price (US\$/Ton) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
