According to our (Global Info Research) latest study, the global Epoxy Resin High Solids Primer market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Epoxy resin high solid primer is a coating product mainly used for surface coating, especially for metal surfaces. This primer is characterized by a high solids content, that is, a high content of non-volatile substances, usually above 50%. This design helps form a thick coating during the coating process, providing good resistance to wear, chemicals and corrosion. As its main component, epoxy resin usually has excellent adhesion and hardness and is suitable for applications that require a higher level of protection, such as industrial equipment, automobiles and ships.
