Abstracts

According to our (Global Info Research) latest study, the global Epoxy Resin Systems for Transportation Composites market size was valued at US$ 413 million in 2025 and is forecast to a readjusted size of US$ 665 million by 2032 with a CAGR of 7.0% during review period.

In 2025, the global sales volume of epoxy resin systems for transportation composite materials is estimated at approximately 113,889 tons, with an average selling price of approximately US$3,521 per ton. The global total production capacity is estimated at approximately 120,000 tons, and the industry's average gross profit margin is estimated at approximately 28.60%.

Epoxy Resin Systems for Transportation Composites are formulated thermosetting resin systems designed for fiber-reinforced composite structures used in passenger vehicles, commercial vehicles, buses, rail transportation, specialty vehicles and off-highway equipment. The systems typically combine epoxy resins with curing agents, accelerators, reactive diluents, toughening agents and other functional additives to provide controlled viscosity, fiber wet-out, cure speed, adhesion, toughness, fatigue resistance, dimensional stability and thermal-mechanical performance. Commercial formulations are mainly supplied as two-component or one-component liquid systems, pastes, films and other formulated resin forms, and are optimized for manufacturing routes such as RTM and HP-RTM, wet compression molding, vacuum infusion, prepreg and out-of-autoclave processing, filament winding, pultrusion and wet lay-up. Epoxy Resin Systems for Transportation Composites are primarily used with carbon fiber, glass fiber and hybrid reinforcements in body structures, exterior panels, chassis and load-bearing components, battery enclosures, underbody protection, interior structural

+357 96 030922
info@marketpublishers.com

parts, suspension-related components and rail vehicle structures, where lightweighting, structural reliability, production efficiency and long-term durability are key material requirements. The upstream sector mainly consists of suppliers of bisphenol A, epichlorohydrin, amine and anhydride curing agents, toughening agents, and specialty additives. Midstream resin system companies supply prepregs, composite material components, and Tier 1 suppliers, ultimately reaching automotive OEMs, rail vehicle manufacturers, and aerospace equipment companies. In the future, lightweighting, electrification, rail transportation upgrades, and the penetration of high-performance composite materials will continue to expand demand. Low-temperature rapid curing, high toughness, flame retardancy, recyclability, and bio-based epoxy systems will become the main product upgrade directions. Companies capable of simultaneously achieving rapid prototyping, automated production, and stable batch supply will have more significant opportunities for new project introductions and domestic substitution.

Market Trends

Epoxy Resin Systems for Transportation Composites are shifting from conventional low-volume composite applications toward formulations that support higher production throughput, more automated processing and tighter integration with vehicle structural design. Faster curing, lower viscosity, improved fiber impregnation and shorter demolding cycles are increasingly important for automotive applications, while higher toughness, fatigue resistance and damage tolerance remain critical for load-bearing and impact-sensitive structures. The expansion of electric vehicles is also changing material requirements, as battery enclosures and underbody protection components increasingly require a combination of structural strength, thermal stability, flame-related performance and crash resistance. In parallel, composite manufacturers are seeking resin systems compatible with carbon fiber, glass fiber and hybrid reinforcement architectures while reducing cycle time, scrap and energy consumption. Sustainability is becoming a secondary but increasingly relevant development direction, encouraging greater attention to lower-temperature processing, bio-based feedstocks, recyclable composite concepts and lower-carbon manufacturing.

Market Dynamics

Drivers

The principal drivers for Epoxy Resin Systems for Transportation Composites are vehicle lightweighting, electrification, stricter requirements for structural efficiency and

+357 96 030922
info@marketpublishers.com

continued adoption of fiber-reinforced composites in transportation components. Reducing vehicle mass can improve energy efficiency and extend electric-vehicle driving range, while composite structures provide opportunities to integrate multiple functions into fewer components. Battery packs, protective covers, structural panels, rail vehicle components and selected chassis applications are creating demand for resin systems capable of combining low density with high mechanical performance, fatigue resistance and reliable processing.

Restraints

Broader adoption is constrained by the cost of composite materials, particularly carbon-fiber-based structures, and by the processing complexity associated with thermoset composite manufacturing. Epoxy systems generally require curing and controlled processing conditions, creating longer cycle times than many metallic stamping or thermoplastic molding processes. Resin, curing-agent and additive costs can also fluctuate with petrochemical and specialty chemical markets. In high-volume automotive applications, material systems must compete not only on mechanical performance but also on total part cost, automation compatibility, takt time, repairability and recyclability.

Opportunities

Important opportunities are emerging in battery enclosures, underbody protection, structural EV components, lightweight commercial vehicles, rail transportation and specialty vehicles where composite structures can deliver high value through weight reduction, corrosion resistance and component integration. Faster-cure epoxy systems for RTM, HP-RTM and wet compression molding offer additional opportunities as manufacturers seek to shorten cycle times and improve production economics. Hybrid structures combining composites with aluminum, steel or thermoplastic components can also broaden the addressable market by allowing epoxy-based composites to be used selectively in high-performance zones rather than replacing conventional materials across an entire vehicle structure.

Challenges

The major challenge is balancing mechanical performance with industrial-scale productivity. Formulators must optimize viscosity, pot life, cure kinetics, fiber wetting, toughness and thermal performance simultaneously, while ensuring stable processing

+357 96 030922
info@marketpublishers.com

across large and geometrically complex components. Transportation customers also require long validation cycles, predictable batch consistency and compatibility with automated molding processes. Competition from high-performance thermoplastics, aluminum, advanced steels and alternative thermoset chemistries remains significant, particularly where recyclability, short cycle times or established manufacturing infrastructure outweigh the structural advantages of epoxy composites.

Industry Chain Analysis

The upstream industry chain for Epoxy Resin Systems for Transportation Composites consists of base epoxy resins, curing agents, accelerators, reactive diluents, toughening agents, flame-retardant additives, fillers and other functional modifiers. These ingredients determine viscosity, cure behavior, toughness, thermal performance and processing window. Reinforcement materials such as carbon fiber and glass fiber form a closely connected parallel supply chain because resin selection must be matched to fiber sizing, architecture and the targeted manufacturing process. Raw-material quality and formulation consistency are particularly important for automotive and rail applications, where reproducibility, long-term mechanical performance and process stability are required.

The midstream segment covers formulation design, blending, modification, quality control and application-specific system development. Value creation is increasingly concentrated in resin-system engineering rather than basic epoxy resin production alone, including control of cure speed, fiber impregnation, toughness, adhesion and compatibility with RTM, wet compression molding, infusion, prepreg, winding or pultrusion processes. Downstream customers include composite molders, Tier 1 component suppliers and transportation OEM supply chains producing body structures, battery protection components, rail structures and other lightweight parts. Profitability is generally supported by formulation know-how and customer qualification in higher-performance applications, while more standardized systems face greater price competition.

Segment Insights

By manufacturing process, RTM and HP-RTM represent strategically important segments for transportation composites because they provide relatively high levels of automation, dimensional control and integration potential for structural components. Wet compression molding also has strong relevance where manufacturers need shorter

+357 96 030922
info@marketpublishers.com

cycle times and efficient processing of fiber-reinforced structures. Vacuum infusion, filament winding, pultrusion and wet lay-up remain important for larger components, specialty vehicles and lower-volume applications, while prepreg and out-of-autoclave systems are used where higher fiber volume fraction and structural performance justify additional material and processing cost.

By reinforcement type, carbon-fiber epoxy systems occupy the higher-performance end of the market, particularly in applications where stiffness-to-weight and strength-to-weight ratios are critical. Glass-fiber epoxy systems generally provide a more favorable cost-performance balance and therefore have broader potential in battery structures, commercial vehicles, rail transportation and other cost-sensitive applications. Hybrid fiber systems are becoming more relevant as designers seek to combine carbon fiber, glass fiber and other reinforcements to achieve targeted performance at a lower total component cost.

Downstream Market Opportunities

Automotive electrification is expanding the opportunity set for Epoxy Resin Systems for Transportation Composites beyond traditional lightweight body panels. Battery enclosures, covers, underbody shields and structural protection components require materials that can provide impact resistance, dimensional stability, corrosion resistance and, in some applications, enhanced thermal or flame-related performance. Commercial vehicles and buses offer additional opportunities where reduced weight can improve payload or energy efficiency, while rail transportation benefits from corrosion resistance, durability and lightweight structural design. Specialty and off-highway vehicles remain attractive for higher-performance composite solutions because production volumes are lower and functional value can outweigh material-cost premiums.

Regional Insights

Europe and Asia-Pacific are important demand and development regions for Epoxy Resin Systems for Transportation Composites due to established automotive, rail and composite manufacturing ecosystems. Europe has a strong technical base in lightweight structures, premium vehicles, motorsport-derived composite technologies and rail applications, supporting demand for high-performance and process-optimized epoxy systems. Asia-Pacific combines large vehicle production volumes with expanding electric-vehicle, battery and composite manufacturing capabilities, making it an increasingly important market for scalable resin formulations and localized supply.

+357 96 030922
info@marketpublishers.com

Mainland China is particularly relevant to future transportation composite demand because of its large automotive and electric-vehicle manufacturing base, while Japan and South Korea maintain strong capabilities in automotive materials, carbon fiber and advanced manufacturing. North America remains important in pickup trucks, specialty vehicles, commercial transportation and selected lightweight structural applications. Regional differences in vehicle design, material cost tolerance, automation levels and local composite supply chains result in different adoption rates for carbon-fiber, glass-fiber and hybrid epoxy composite systems.

Competitive Landscape Analysis

The competitive landscape of Epoxy Resin Systems for Transportation Composites includes diversified epoxy and specialty chemical suppliers as well as dedicated composite resin formulators. Confirmed participants such as Westlake Corporation, Huntsman Corporation, Olin Corporation, Aditya Birla Chemicals, KUKDO CHEMICAL, Sika, Syensqo, Gurit, Sicomin, Resoltech, DIC, Mitsubishi Chemical Group, Atul, SPOLCHEMIE, Evonik, Wells Advanced Materials, Techstorm Advanced Material and Jiangsu Sanmu participate with different product portfolios and application focuses. Competition is shaped less by basic epoxy resin scale alone and more by formulation know-how, cure-cycle optimization, fiber compatibility, application engineering, customer qualification and local technical support. Large diversified suppliers benefit from upstream resin integration, global customer relationships and broader formulation platforms, while specialist formulators can compete through faster customization and process-specific solutions. In transportation applications, the ability to demonstrate repeatable processing performance and long-term structural reliability is a major barrier to entry, particularly for safety-related and high-volume OEM programs.

Report Scope

This report is a detailed and comprehensive analysis for global Epoxy Resin Systems for Transportation Composites market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

+357 96 030922
info@marketpublishers.com

Key Features:

Global Epoxy Resin Systems for Transportation Composites market size and forecasts, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2021-2032

Global Epoxy Resin Systems for Transportation Composites market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2021-2032

Global Epoxy Resin Systems for Transportation Composites market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2021-2032

Global Epoxy Resin Systems for Transportation Composites market shares of main players, shipments in revenue ($ Million), sales quantity (Tons), and ASP (US$/Ton), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Epoxy Resin Systems for Transportation Composites

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Epoxy Resin Systems for Transportation Composites market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Westlake Corporation, Huntsman Corporation, Olin Corporation, Aditya Birla Chemicals

+357 96 030922
info@marketpublishers.com

(Thailand) Limited, KUKDO CHEMICAL CO., LTD., Sika AG, Syensqo SA, Gurit Holding AG, Sicomin, Resoltech, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Epoxy Resin Systems for Transportation Composites market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Chapter Outline

Chapter 1, to describe Epoxy Resin Systems for Transportation Composites product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Epoxy Resin Systems for Transportation Composites, with price, sales quantity, revenue, and global market share of Epoxy Resin Systems for Transportation Composites from 2021 to 2026.

Chapter 3, the Epoxy Resin Systems for Transportation Composites competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Epoxy Resin Systems for Transportation Composites breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Epoxy Resin Systems for Transportation Composites market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Epoxy Resin Systems for Transportation Composites.

Chapter 14 and 15, to describe Epoxy Resin Systems for Transportation Composites sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global Epoxy Resin Systems for Transportation Composites Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Wet Compression Molding Epoxy Systems
  1.3.3 Vacuum Infusion Epoxy Systems
  1.3.4 Prepreg and Out-of-Autoclave Epoxy Systems
  1.3.5 Filament Winding Epoxy Systems
  1.3.6 Others
1.4 Market Analysis by Curing Method
  1.4.1 Overview: Global Epoxy Resin Systems for Transportation Composites Consumption Value by Curing Method: 2021 Versus 2025 Versus 2032
  1.4.2 Ambient-Cure Type
  1.4.3 Heat-Cure Type
  1.4.4 Others
1.5 Market Analysis by Resin System
  1.5.1 Overview: Global Epoxy Resin Systems for Transportation Composites Consumption Value by Resin System: 2021 Versus 2025 Versus 2032
  1.5.2 Bisphenol-A Epoxy System
  1.5.3 Bisphenol-F Epoxy System
  1.5.4 Epoxy Novolac System
  1.5.5 Others
1.6 Market Analysis by Resin Delivery Form
  1.6.1 Overview: Global Epoxy Resin Systems for Transportation Composites Consumption Value by Resin Delivery Form: 2021 Versus 2025 Versus 2032
  1.6.2 Two-component or Multi-component Systems
  1.6.3 One-component Epoxy Systems
1.7 Market Analysis by Application
  1.7.1 Overview: Global Epoxy Resin Systems for Transportation Composites Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.7.2 Body and Exterior Structures
  1.7.3 Chassis and Load-bearing Structures
  1.7.4 Battery Enclosures and Protection Structures
  1.7.5 Underbody and Impact Protection Components

by Application (2021-2032)
7.3 North America Epoxy Resin Systems for Transportation Composites Market Size by Country
7.3.1 North America Epoxy Resin Systems for Transportation Composites Sales Quantity by Country (2021-2032)
7.3.2 North America Epoxy Resin Systems for Transportation Composites Consumption Value by Country (2021-2032)
7.3.3 United States Market Size and Forecast (2021-2032)
7.3.4 Canada Market Size and Forecast (2021-2032)
7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Epoxy Resin Systems for Transportation Composites Sales Quantity by Type (2021-2032)
8.2 Europe Epoxy Resin Systems for Transportation Composites Sales Quantity by Application (2021-2032)
8.3 Europe Epoxy Resin Systems for Transportation Composites Market Size by Country
8.3.1 Europe Epoxy Resin Systems for Transportation Composites Sales Quantity by Country (2021-2032)
8.3.2 Europe Epoxy Resin Systems for Transportation Composites Consumption Value by Country (2021-2032)
8.3.3 Germany Market Size and Forecast (2021-2032)
8.3.4 France Market Size and Forecast (2021-2032)
8.3.5 United Kingdom Market Size and Forecast (2021-2032)
8.3.6 Russia Market Size and Forecast (2021-2032)
8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Epoxy Resin Systems for Transportation Composites Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Epoxy Resin Systems for Transportation Composites Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Epoxy Resin Systems for Transportation Composites Market Size by Region
9.3.1 Asia-Pacific Epoxy Resin Systems for Transportation Composites Sales Quantity by Region (2021-2032)

+357 96 030922
info@marketpublishers.com

9.3.2 Asia-Pacific Epoxy Resin Systems for Transportation Composites Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)
9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Epoxy Resin Systems for Transportation Composites Sales Quantity by Type (2021-2032)
10.2 South America Epoxy Resin Systems for Transportation Composites Sales Quantity by Application (2021-2032)
10.3 South America Epoxy Resin Systems for Transportation Composites Market Size by Country
10.3.1 South America Epoxy Resin Systems for Transportation Composites Sales Quantity by Country (2021-2032)
10.3.2 South America Epoxy Resin Systems for Transportation Composites Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Epoxy Resin Systems for Transportation Composites Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Epoxy Resin Systems for Transportation Composites Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Epoxy Resin Systems for Transportation Composites Market Size by Country
11.3.1 Middle East & Africa Epoxy Resin Systems for Transportation Composites Sales Quantity by Country (2021-2032)
11.3.2 Middle East & Africa Epoxy Resin Systems for Transportation Composites Consumption Value by Country (2021-2032)
11.3.3 Turkey Market Size and Forecast (2021-2032)
11.3.4 Egypt Market Size and Forecast (2021-2032)
11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Epoxy Resin Systems for Transportation Composites Market Drivers
12.2 Epoxy Resin Systems for Transportation Composites Market Restraints
12.3 Epoxy Resin Systems for Transportation Composites Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers
12.4.3 Bargaining Power of Buyers
12.4.4 Threat of Substitutes
12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Epoxy Resin Systems for Transportation Composites and Key Manufacturers
13.2 Manufacturing Costs Percentage of Epoxy Resin Systems for Transportation Composites
13.3 Epoxy Resin Systems for Transportation Composites Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
14.1.1 Direct to End-User
14.1.2 Distributors
14.2 Epoxy Resin Systems for Transportation Composites Typical Distributors
14.3 Epoxy Resin Systems for Transportation Composites Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

16 APPENDIX

16.1 Methodology
16.2 Research Process and Data Source
16.3 Disclaimer

I would like to order

Product name: Global Epoxy Resin Systems for Transportation Composites Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/GEC8E1328417EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/GEC8E1328417EN.html
