Abstracts

The global Equestrian Helmets market size is expected to reach \$ 116 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

An equestrian helmet is a form of protective headgear worn when riding horses. This type of helmet is specially designed to protect the rider's head during falls off a horse, especially from striking a hard object while falling or being accidentally struck in the head by a horse's hoof.

Certified helmets are required headgear for many competitive riding events, particularly where horse and rider must jump or work at high speed. Helmets are worn more often by English-style riders and are gaining acceptance as required headgear for children. They are also widely accepted in fields such as horse racing, eventing or show jumping. They are required in eventing, in endurance riding and other types of competitions. People who take their horses hacking or trail riding sometimes wear helmets, though there are tremendous variations in helmet use in different regions and cultures. In the United States, use is by fewer than one in eight riders. Some states, such as Florida and New York, are starting to require by law that riders under the age of 14 wear helmets at equestrian establishments, on public highways and publicly owned land.

Global Equestrian Helmets key players include Troxel, Ovation, UVEX, etc. Global top three manufacturers hold a share about 30%.

Europe is the largest market, with a share over 40%, followed by USA, and Canada, both have a share about 35 percent.

In terms of product, Basic Helmet is the largest segment, with a share nearly 55%. And

in terms of application, the largest application is Women, followed by Men, Children.
