Abstracts

Governments and various animal health institutions spread awareness about the need for good healthy diets and health supplements for the growth and healthy life of the horses among the horse breeders and trainers in various equine industries. Moreover, they provide information and awareness about the need for prevention of certain diseases and the remedy for some medical conditions. Increasing awareness about equine pharmaceuticals and supplements products is driving the growth of the global equine pharmaceuticals and supplements market. Demand for herbal digestive, feed, and energy supplements for horses are increasing due to the preference among horse breeders and trainers for natural products and it is expected to drive the growth of the pharmaceuticals and supplements market. The horseracing and equestrian sectors drive the demand for equine pharmaceutical products, as the health of the horses are very important for sustaining the growth of those sectors. Healthy horses in these sectors provide the impetus for the betting and gambling industries related to horse racing. Therefore, most of the trainers and breeders of horses adopt advanced pharmaceutical products for preventing illnesses and for healing the diseases, so that the horses are in good shape for the races.
