Abstracts

A cock ring or erection ring is worn to prolong and heighten orgasms, leading to a satisfactory sexual intercourse. Generally, the mechanism of erection rings is that they trap the blood flow in the penis and stops the blood going backward. Therefore, the use of erection rings will help men experience increased sensitivity along with harder erections.

Scope of the Report:

This report focuses on the Erection Ring in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The online store segment accounted for the majority of market shares and will continue to lead the market during the forecast period.

In terms of geography, the Americas was the highest revenue contributing region in the market and will continue to lead the market in the coming years. The growth of this market in the region is attributed to the increase in availability of sexual wellness products, including erection rings, because of the expanding number of adult stores across the region.

The worldwide market for Erection Ring is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
