The global Erythrocyte Sedimentation Rate (ESR) Instrument market size is expected to reach \$ 433 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Erythrocyte Sedimentation Rate (ESR) Instrument is a clinical laboratory instrument that measures the Erythrocyte Sedimentation Rate (ESR), or the speed at which red blood cells settle in anticoagulated blood, typically over one hour. It is used to detect and monitor inflammation, infections, autoimmune diseases, and cancers by analysing how far red blood cells fall in a tube. Modern automated analysers often use infrared technology to provide fast, standardized, and precise results, often in less than 30 minutes.

In 2025, the global sales of Erythrocyte Sedimentation Rate (ESR) Instrument are expected to reach 38,600 units, with an average price of USD 8,194 per unit and an industry gross profit margin of approximately 38%.

Globally, the aging population (over 65 years) is rising significantly. Elderly patients often suffer from multiple chronic and inflammatory conditions requiring routine inflammation screening.

One of the primary drivers for Erythrocyte Sedimentation Rate (ESR) Instrument is the increasing global burden of chronic inflammatory diseases (e.g., rheumatoid arthritis, systemic lupus erythematosus), infections (e.g., tuberculosis, endocarditis), and other autoimmune conditions. ESR is a widely used biomarker for assessing inflammation and disease progression in these conditions.

Modern laboratories are adopting automated ESR analyzers to replace manual Westergren or micro-sedimentation methods, which are labor-intensive and time-consuming.

This report studies the global Erythrocyte Sedimentation Rate (ESR) Instrument production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Erythrocyte Sedimentation Rate (ESR) Instrument and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
