## Abstracts

The global Ethanol Derivatives market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The global Ethanol Derivatives market has expanded to reach approximately 4400 thousand tonnes in 2022 and is expected to grow at an impressive CAGR of 5.23% during the forecast period until 2029. High demand for ethanol derivatives as it is used as a cleaning agent and as a solvent is the major driver for the forecast period.

Ethanol can be produced from the fermentation process of an organic substance as well as by Ethylene under the influence of a catalyst for industrial purposes. Ethanol Derivatives are a vast market comprising a number of chemical products filtered in different categories as per their applications and properties. Some of the major ethanol derivatives are ethyl acetate, ethyl esters, ethylene, ethyl chloride, ethyl bromide, diethyl ether, and acetaldehyde. With the increasing number of facilities for the production of Ethanol on the back of its high demand as a renewable fuel and cleaning agent, Ethanol derivatives have gained huge preference owing to the affordable prices and eco-friendly product in comparison to several crude derivatives.

This report studies the global Ethanol Derivatives production, demand, key manufacturers, and key regions.
