The global Ether Amine market size is expected to reach \$ 2674 million by 2032, rising at a market growth of 8.3% CAGR during the forecast period (2026-2032).

Ether amines are a unique class of industrial chemicals used primarily in epoxy systems. Mainly used to increase flexibility, toughness, hydrophilicity or hydrophobicity (depending on the product used), they also offer various reactivities, good temperature stabilities, are essentially colourless and have a low viscosity. Because of their unique structure and variety of chemical reactions, these products have found their way into many different end uses.

Global Ether Amine key players include Huntsman, BASF, Air Products, Zibo Zhengda, Wuxi Acryl, etc. Global top five manufacturers hold a share about 90%. North America and Asia is the largest market, both with a share about 35%, followed by Europe, with a share about 25 percent. In terms of application, the largest application is Epoxy Coating, followed by Polyurea, Fuel Additives, etc.
