## Abstracts

The global Ethernet Over Fiber Extender market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

An Ethernet Over Fiber Extender is a networking device designed to extend Ethernet connectivity over fiber optic cables. It allows the expansion of network reach by transmitting Ethernet signals over longer distances compared to traditional copper-based Ethernet connections. This technology is often employed in situations where the distance between network devices exceeds the typical limitations of copper-based Ethernet, which is approximately 100 meters for standard Ethernet cables.

This report studies the global Ethernet Over Fiber Extender production, demand, key manufacturers, and key regions.
