## Abstracts

Ethyl mercaptan is a clear liquid with a distinct odor. It is an organosulfur compound with the formula  $\text{CH}_3\text{CH}_2\text{SH}$ . Abbreviated EtSH, it consists of an ethyl group (Et),  $\text{CH}_3\text{CH}_2$ , attached to a thiol group, SH. Its structure parallels that of ethanol, but with S instead of O. The odor of EtSH is infamous. Ethyl mercaptan is more volatile than ethanol due to a diminished ability to engage in hydrogen bonding. Ethyl mercaptan is toxic. It occurs naturally as a minor component of petroleum, and may be added to otherwise odorless gaseous products such as liquefied petroleum gas (LPG) to help warn of gas leaks. At these concentrations, ethyl mercaptan is not harmful.

### Scope of the Report:

This report focuses on the Ethyl Mercaptan in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The next few years, the China demand for ethyl mercaptan will continue to expand a little. However, with rule limit of environment protection, the use of ethyl mercaptan would decrease.

Despite the presence of competition problems, due to the China recovery trend is clear, investors are still optimistic about this area. In the future, the market will have some growth. Although sales of ethyl mercaptan brought a lot of opportunities, the study group recommends that the new entrants just having money but without technical advantage and downstream support do not enter into this field.

The worldwide market for Ethyl Mercaptan is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
