Abstracts

The global Ethylene Cold Box market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Ethylene cold box is one of the key equipment of ethylene plant. Different raw materials (natural gas, light oil, etc.) can be used to produce ethylene, and there are different production processes. However, the raw material mixture produced must be separated and purified to obtain the desired ethylene product. Therefore, in the separation process of product raw material mixed gas, low temperature separation is a method that must be adopted in all processes. Ethylene cold box is one of the main equipment for low temperature separation.
