Ethylene propylene rubber tapes are functional tape products manufactured from ethylene-propylene rubber (EPR) or ethylene-propylene-diene monomer (EPDM) elastomers through compounding, calendaring or extrusion, and vulcanization processes. In 2025, global ethylene propylene rubber tapes production reached approximately 75,358 ton, with an average global market price of around USD 4,500 per ton. A factory gross profit of USD 2,250 per ton with 30% gross margin. A single line full machine capacity production is around 250 ton per line per year. The upstream is dependent on monomer, fillers and plasticizers. The downstream demand is concentrated in electrical utilities, industrial and automotive. EPR Tape used to join and repair power cable to protect electrical connections due to its ability to waterproof and insulation. China and India market driven by massive power infrastructure growth. US market is driven by large electrical utility sector and companies.
