According to our (Global Info Research) latest study, the global EV Active Instant Breaker market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

When the signal is detected from the vehicle, an ignition current is generated to operate the Active Instant Breaker, shutting down the circuit, preventing electrical flow and decrease the risk of fire. Pyro switch is controlled by software and precisely cuts off the circuit in a few milliseconds. Pyro switch can cut off current in the event of current faults (short circuit/electrical overload, etc.) or non-current faults (collision/overheating, etc.) to protect passengers and vehicles.
