## Abstracts

The global EV Adhesive-Laminated Motor Core market size is expected to reach \$ 2785 million by 2032, rising at a market growth of 11.6% CAGR during the forecast period (2026-2032).

An EV Adhesive-Laminated Motor Core is a core component of a motor that uses adhesive bonding processes (such as epoxy resin or polyurethane resin) to bond laminations or layers of the motor core together. This technology is primarily used in motor systems of electric vehicles (EVs) and hybrid electric vehicles (HEVs) as a crucial component of the drive motor. Adhesive bonding replaces traditional welding or mechanical connections, providing higher magnetic permeability and lower energy loss, thereby improving the overall performance and efficiency of the motor. In 2025, global production of EV Adhesive-Laminated Motor Cores reached approximately 11.58 million units, with an average price of US\$108.1 per unit and a gross margin of approximately 20.43%. Downstream customers include domestic and international automotive parts manufacturers, vehicle manufacturers, and motor manufacturers, such as Valeo, Bosch Group, Aldor Group, Inovance Technology, and BYD. Production Capacity: Mitsui High Tec Inc. supplies more than 1.6 million motor cores annually for automotive applications.

**Electric Vehicle Market Growth:** With the increasing demand for electric vehicles, especially high-end electric vehicles, the market demand for Adhesive-Laminated Motor Cores, as a high-efficiency solution, will further increase. **Performance Requirements:** Electric vehicles place increasingly higher demands on drive motors, and Adhesive-Laminated Motor Cores offer lower energy loss and efficient thermal management, contributing to improved overall motor performance. **Manufacturing Technology Advancements:** Continuous optimization of bonding technology has led to gradually

decreasing production costs, enabling the application of Adhesive-Laminated Motor Cores in more fields, particularly in applications requiring lightweight and high-efficiency motors.
