Abstracts

According to our (Global Info Research) latest study, the global EV Battery Thermal Management Fluids market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

High running temperatures can cause car batteries to overheat, reducing battery capacity and driving range. Electric Vehicle Thermal Management Fluids, with its an extended life coolant concentrate, helps keep EV batteries cool and maintain the right temperature, preserving performance under extreme conditions.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
