EV Smart Charge Controllers are an important part of electric vehicle charging station. Smart Charge Controllers manage security, services and connections to remote servers, controlling and monitoring the charging process of electric vehicles. The main functions of the smart charge controller are communicated with the vehicle and the backend, monitor the internal hardware of the charging system, the user interfaces as well as the connection between the charging station and the vehicle and distributes the load current efficiently through dynamic load management.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
