According to our (Global Info Research) latest study, the global EV Charging Station and Charging Pile market size was valued at USD 1846.2 million in 2023 and is forecast to a readjusted size of USD 12040 million by 2030 with a CAGR of 30.7% during review period.

An electric vehicle charging station, also called EV charging station, electric recharging point, charging point, charge point, ECS (electronic charging station), and EVSE (electric vehicle supply equipment), is an element in an infrastructure that supplies electric energy for the recharging of plug-in electric vehicles—including electric cars, neighborhood electric vehicles and plug-in hybrids.

For charging at home or work, some EVs have onboard converters that can plug into a standard electrical outlet or a high-capacity appliance outlet. Others either require or can use a charging station that provides electrical conversion, monitoring, or safety functionality. These stations are also needed when traveling, and many support faster charging at higher voltages and currents than are available from residential EVSEs. Public charging stations are typically on-street facilities provided by electric utility companies or located at retail shopping centers, restaurants and parking places, operated by a range of private companies.

China is the largest EV Charging Station and Charging Pile market with about 41% market share. United States is follower, accounting for about 29% market share. The key manufacturers are Webasto, Leviton, Auto Electric Power Plant, Pod Point, Clipper Creek, Chargepoint, Xuji Group, Eaton, ABB, Schneider Electric, Siemens, DBT-CEV, Efacec, NARI, IES Synergy etc. Top 3 companies occupied about 26% market share.
