According to our (Global Info Research) latest study, the global EVOH Resin for Packaging Film market size was valued at US\$ 1216 million in 2025 and is forecast to a readjusted size of US\$ 1676 million by 2032 with a CAGR of 4.7% during review period.

EVOH is a high-quality barrier material with excellent gas and odor barrier properties. Its application in packaging materials can extend the shelf life of food and beverages and effectively maintain their freshness and taste.

Driven by environmental policies and consumer demand, the EVOH industry is accelerating its transformation towards sustainable packaging materials. In the future, EVOH will be used more in biodegradable, recyclable and environmentally friendly packaging materials, especially in food and cosmetics packaging. Companies in the industry will need to continue to innovate to improve the environmental performance of the material while maintaining its high barrier properties and good processing properties to meet the market's stringent requirements for environmentally friendly packaging. This trend is expected to drive continued growth in the EVOH industry worldwide.

Economic growth and consumption upgrades in the Asian market are driving demand for EVOH materials, especially in the application of insulation boards for refrigerators and packaging materials. As market demand for high-performance packaging materials increases, the application of EVOH film in Asia will continue to expand. Kuraray expects to deploy EVOH in Singapore and start operations by the end of 2026, marking the first time Kuraray has produced this material in Southeast Asia. The new plant will have an initial capacity of 36,000 tons per year and a second phase capacity of 18,000 tons per year.

Legislative measures by the European Parliament and the Council will drive the EVOH industry towards green packaging materials. By increasing the use of recycled materials and enforcing reuse rules, EVOH will become a mainstream packaging material that meets environmental standards in the future, further enhancing its market competitiveness and breadth of application.
