Abstracts

The global Exfoliators and Scrubs market size is expected to reach \$ 2680 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

Exfoliators and scrubs are used to remove the dead skin cell present on the skin's outermost surface. Exfoliators and scrubs are useful for all the skin types. In this report, exfoliators and scrubs are divided into plant type, chemical type and flower essential oil type. Exfoliators and scrubs are skincare products used to remove dead skin cells, dirt, and excess oil from the skin's surface. They mainly include physical scrubs and chemical exfoliants, helping to improve skin texture, promote the absorption of subsequent skincare products, and enhance skin radiance.

The upstream supply chain mainly includes surfactants, exfoliating particles, glycolic acid and salicylic acid, plant extracts, moisturizers, emulsifiers, and packaging materials. The downstream market primarily targets daily chemical retailers, e-commerce platforms, beauty salons, skin management institutions, and personal home care consumers. The global market price for exfoliating products is \$20.2 per unit, with annual sales of approximately 102.5 million units.

The global exfoliating and scrubbing product market will develop towards gentler, more segmented, more multifunctional, and more green and sustainable directions. Consumers' increasing focus on sensitive skin-friendly and low-irritant formulas is driving faster market penetration for products containing enzymes, PHAs, plant-derived acids, and biodegradable exfoliating particles. Simultaneously, brands will launch more targeted products for different skincare areas, including the face, body, scalp, and lips, enhancing their combined cleansing, moisturizing, brightening, and acne-fighting effects. With the expansion of online channels, increased awareness of ingredient

properties, and the upgrading of high-end personal care consumption, market competition will increasingly emphasize formula innovation, eco-friendly packaging, and brand differentiation.

This report studies the global Exfoliators and Scrubs production, demand, key manufacturers, and key regions.
