Abstracts

The global Expandable Balcony Energy Storage System market size is expected to reach \$ 5158 million by 2032, rising at a market growth of 21.1% CAGR during the forecast period (2026-2032).

In 2025, global Expandable Balcony Energy Storage System production reached approximately 467k units, with an average global market price of around US\$2.8k per unit.

Expandable Balcony Energy Storage System is a modular residential energy storage solution designed for balcony photovoltaic applications, in which battery capacity can be expanded by adding additional battery modules. The system typically works together with balcony solar panels and micro-inverters to store excess electricity generated during the day and supply power to households during the night or peak demand periods. Compared with fixed-capacity storage systems, expandable balcony energy storage systems allow users to gradually increase storage capacity according to their energy consumption needs, improving solar self-consumption and enhancing household energy independence.

The upstream supply chain of expandable balcony energy storage systems mainly includes lithium battery cell suppliers, battery management system (BMS) providers, inverter manufacturers, power electronic component suppliers, photovoltaic module manufacturers, and structural component producers. Representative upstream companies include CATL, BYD, EVE Energy, Huawei Digital Power, Sungrow, LONGi, and Trina Solar. The midstream segment consists of balcony storage system manufacturers and system integrators such as EcoFlow, Anker SOLIX, Zendure, AlphaESS, Hoymiles, Growatt, Vigorpool, and Marstek Energy, which design battery

modules, integrate micro-inverters, and develop energy management systems. Downstream customers mainly include residential users, balcony solar installers, and distributed energy service providers. These systems are widely used in apartment balcony photovoltaic installations and small residential energy management solutions, where the modular design allows users to expand battery capacity according to their electricity consumption needs.

The annual production capacity of a single-line Expandable Balcony Energy Storage System is approximately 5k units, with a gross profit margin of approximately 20%-35%.
