Abstracts

The global Expandable Graphite market size is expected to reach \$ 336 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Expandable graphite is a new type of functional carbon material. It is made by the natural graphite flake, and is the unexpanded graphite, i.e. it is a type of natural graphite that before expanded.

Global core expandable graphite manufacturers include Xincheng Graphite, GrafTech, SGL Carbon, etc. The top three companies hold a share about 44%. The global expandable graphite products are mainly produced in United States, China and Europe, they occupied for a share over 75%. Asia-Pacific is the largest market, has a share about 48%, followed by Europe and North America, with share 26% and 20%, separately.

In terms of product type, ordinary expandable graphite is the largest segment, accounting for about 78% of the share, while in terms of application, flame retardants are the largest downstream field, accounting for about 45%.

China is the largest producer of expandable graphite in the world in the past few years and it will keep the same position in the next few years. China takes above 60% of the global expandable graphite production.

The price of expandable graphite, 90% of the determinants are determined by the number of meshes. Different mesh sizes, different prices. The 50 and 100-mesh products are lower in price, and the 80-mesh products are the most expensive.

This report studies the global Expandable Graphite production, demand, key manufacturers, and key regions.
