According to our (Global Info Research) latest study, the global Expandable Graphite market size was valued at US\$ 249 million in 2024 and is forecast to a readjusted size of USD 324 million by 2031 with a CAGR of 3.9% during review period.

Expandable graphite is a new type of functional carbon material. It is made by the natural graphite flake, and is the unexpanded graphite, i.e. it is a type of natural graphite that before expanded.

Global core expandable graphite manufacturers include Xincheng Graphite, GrafTech, SGL Carbon, etc. The top three companies hold a share about 44%. The global expandable graphite products are mainly produced in United States, China and Europe, they occupied for a share over 75%. Asia-Pacific is the largest market, has a share about 48%, followed by Europe and North America, with share 26% and 20%, separately.

In terms of product type, ordinary expandable graphite is the largest segment, accounting for about 78% of the share, while in terms of application, flame retardants are the largest downstream field, accounting for about 45%.

China is the largest producer of expandable graphite in the world in the past few years and it will keep the same position in the next few years. China takes above 60% of the global expandable graphite production.

The price of expandable graphite, 90% of the determinants are determined by the number of meshes. Different mesh sizes, different prices. The 50 and 100-mesh

products are lower in price, and the 80-mesh products are the most expensive.
