Abstracts

The global Expansion Joint Tapes market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Expansion joint tapes are based on thermoplastic elastomer chemistry, designed for primary seal of high movement expansion gaps, suitable across various surfaces/substrates, providing water tightness, continuity of seal throughout changes in plane and direction including curves and corners, high degree of puncture resistance and elongation. For permanent sealing of various junctions and cracks in common with embedding materials, underneath ceramic tiles or natural stones, in outdoor or indoor construction parties like, bathrooms, showers, swimming pools, balconies, terraces etc.. It's highly resistant on hydrostatic pressure and vapor permeable, tear proof and chemical resistant. Very good behaviour on temperature differences.

This report studies the global Expansion Joint Tapes production, demand, key manufacturers, and key regions.
