The global Explosion-proof Cleaning Equipment market size is expected to reach \$ 293 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

In 2025, global sales of explosion-proof cleaning equipment reached 50,000 units, with an average selling price of US\$3,500 per unit. Explosion-proof cleaning equipment is a high-efficiency cleaning device specifically designed for flammable and explosive environments, widely used in industries such as petrochemicals, mining, power, and pharmaceuticals. Its main function is to prevent explosions or fires caused by electrical sparks or other factors during equipment cleaning operations in hazardous areas. This equipment is typically equipped with explosion-proof motors, anti-static materials, and protective housings, capable of withstanding extreme environments such as high temperatures, high humidity, and strong corrosion, ensuring the safety and efficiency of equipment operation.

Its upstream raw materials mainly include explosion-proof motors, steel, plastic protective materials, and sealing materials, sourced from manufacturers of electrical components, metal materials, and plastics. The downstream supply chain mainly involves petrochemical companies, power companies, and large manufacturing users. The total production capacity of explosion-proof cleaning equipment is estimated at 70,000 units per year, with a gross profit margin of 30%. Downstream consumption is mainly concentrated in the routine maintenance of industries such as petrochemicals, power, and mining, while upstream material consumption is mainly concentrated in the procurement of explosion-proof motors and metal materials.

With the improvement of industrial safety standards, enterprises are gradually

increasing their demand for explosion-proof cleaning equipment, especially in high-risk operating environments. It is expected that this market will usher in greater growth opportunities in the future, especially against the backdrop of increasingly stringent global regulations on safe production and environmental protection.
