According to our (Global Info Research) latest study, the global Explosion-proof Freezer market size was valued at USD 906.8 million in 2023 and is forecast to a readjusted size of USD 1531.2 million by 2030 with a CAGR of 7.8% during review period.

Explosion-proof Freezers are special refrigerators, mainly used in special environments, to store dangerous materials that are difficult to store, volatile, flammable and explosive at room temperature, such as cooling and storing pharmaceutical reagents at lower temperatures.

The Explosion-Proof Freezers are engineered to prevent triggering an explosion inside or outside the unit. The thermostat and compressor components are isolated within a vapor-proof enclosure. All electrical connections are hardwired to prevent sparking and accidental disconnection. Explosion-proof refrigerators need to meet the standards of different application areas.
